FURTHER INFORMATION

Alberico L. Catapano has been involved from 1972 in the field of Atherosclerosis, Lipids, Lipoproteins and genetic dyslipidaemias. From the scientific standpoint Prof. Catapano has made landmark observations regarding the role of HSP's and of Petranxins in Atherogenesis and on the role of HDL in the modulation of the immune response. Alberico Catapano is Full Professor of Pharmacology at the University of Milano, Director of the Laboratory for the study of Lipoproteins and Atherosclerosis and of the Center for the Study of Atherosclerosis of the Italian Society of Atherosclerosis (S.I.S.A.) at the "Bassini" Hospital. He is also the Director of Center of Epidemiology and Preventive Pharmacology of the University of Milano (SEFAP). Professor Catapano is Past President of the European Atherosclerosis Society (EAS) and the Chairman of the EAS/ESC guidelines for the treatment of dyslipoproteinemias. He holds board positions in several learned Scientific Societies including the Italian Society for the Study of Atherosclerosis ; he is also President of the Italian Society of Clinical and Experimental Therapy (SITeCS) and General Director of the SISA Foundation.

He has authored more than 423 scientific papers in peer-reviewed journals and several books in the area of the atherosclerosis, lipoproteins and lipid metabolism. He is Editor of Atherosclerosis Supplements and also Co-editor of Atherosclerosis and Associate Editor of other scientific journals. According to Google Scholar, his H-index is 74 and the last 5 years has received more than 19,000 citations.

AUTHORIZATION OF PERSONAL DATA
